For Mayor of Ajax

Ajax is named in honour of those who fought to defend freedom over tyranny. Ajax's success is based on building a Town that reflects those same values of Family, Faith, and Freedom. As Mayor I will work to ensure that those values are reflected in Council's decisions as we work to keep Ajax a safe, family focused community.

I will work to support growth and economic development that enhances our Town's character instead of fundamentally changing the fabric of Ajax. I will work to ensure that the residents of Ajax have effective input in the shaping and planning of their Town. We need to balance the rights of residents, developers, and other stakeholders as we pursue our growth plans.

I will work with Durham Regional Police Services to ensure that they have the proper resources to identify the sources and stop the growing crime activity in Ajax. I and my family have witnessed firsthand the growing crime problem in Ajax over the last 25 years. We need to work with the Police and Community to identify issues, create solutions and keep our Town safe.

I will work to end all Covid-19 mandates and testing requirements and ensure that separation and discrimination of Canadians based on medical treatments never happens again. We need to ensure that all actions of Council honour the supremacy of the Canadian Constitution and the Canadian Charter of Rights and Freedoms and that no laws infringe on our fundamental rights.

I will work to challenge the Marxist teachings of Critical Race Theory and other Woke ideologies that want to divide us with false history and radical beliefs. We are a country based on the supremacy of God, the recognition of our fundamental rights and the rule of law. We are all equal before the law. People come from all over the world to embrace and enjoy our freedom. We need to come together as a community with love and shared values and reject the hate and division that is disguised as Diversity Training.

I will work to challenge the claims that we are facing a "Climate Emergency". Climate is always changing but, the science doesn't support getting rid of fossil fuels and transitioning to so called "Green" energy. Political agendas and not evidence based decisions are responsible for eliminating affordable energy, destroying our economy, wasting billions of tax dollars, and threatening our way of life.

As a small business owner, I understand the challenges of working with a budget and delivering competitive services. I will work with Staff and Council to ensure that the Town continues to supply services and programs in the most cost-effective and efficient manner possible. My priority will be to keep our taxes at the lowest possible level.
